BAKERY PREMIXES

Baked goods are a part and parcel of one's food habits. Be it a cookie with coffee or a sandwich at lunch, there is an abundance of baked goods for one to choose from throughout the day. The consumption of bread and bakery products in Europe is estimated to be 57kgs per capita, establishing that bakery products make their way into almost every

meal providing us with an opportunity for vitamin and mineral fortification. This enables us to improve the nutritional status of the bakery product.

MIAVIT Food specializes in creating customized vitamin and mineral blends according to customer requirements for various bakery products.

MIAVIT FOOD

The extensive experience and knowledge at MIAVIT Food enables one to acquire the perfect micronutrient blend for the product at hand. The blends are customized on the bases of need for each product with an aim to minimize compound interactions and undesirable effects to achieve a palatable end product of high standards.
